AI-driven Career Guidance: Assess users' skills and interests to suggest suitable career paths and development plans.

Step: The following step to upload a Repository to GitHub via GitBash.

Step1: Install Git:

Step2: Configure Git (only needed once)

      Bash code or Git terminal: we can follow any one

      I create the repository by git bash:

      Git config –global user .name "shrey-2006"

      git config –global user.email "gadhiyashrey544@gmail.com".

Step3: Create a repository on GitHub:

      First i log in to GitHub.

      Click on "New Repository" and give it a name.

      Keep it public or private ,here I keep public.

Step4: Go to project folder:

      Open the terminal and navigate to the folder containing your files:

      Bash code = cd ..

      Cd shrey_019

Step5: Initialize Git:(create a new local repository)

Bash code = git init shrey_019

Step6: Create the assignment folders:

Bash code = mkdir Assignment_1

mkdir Assignment_2

Step7: Add the folder to Git:

Bash code = git add Assignment_1 Assignment_2

Step8: commit the changes:

Bash code = git commit -m "Added Assignment_1 and Assignment_2 folders"

Step9: Push the Changes to GitHub:

Bash code = git push -u origin master
